

# Ergo-Cage

Inflation cage

## PROPERTIES

- For wheels of passenger cars, vans and light transport vehicles
- Can be daisy-chained indefinitely with the Ergo-Roll
- Rollers mounted on ball bearings
- Recyclable polymer rolls
- Adjustable in height
- Adjustable inclination
- Standard colour: red RAL3020

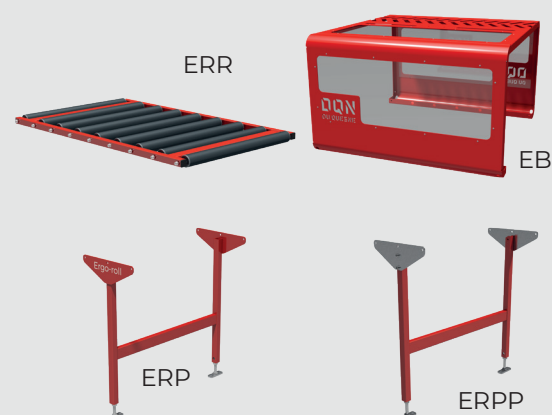

## TECHNICAL INFORMATION

CAPACITY	1 wheel
MAX. LOAD WEIGHT/ROLL	50 kg
MAX. LOAD WEIGHT	450 kg
NUMBER OF ROLLS	9
LENGTH	120 cm
WIDTH	90 cm
HEIGHT	120/130 cm
WEIGHT	45 kg
PASSAGE WIDTH	84 cm
PASSAGE HEIGHT	46 cm

The Ergo-Cage (EC) consists of three elements:

- The Ergo-Box (EB)
- The roller table (ERR)
- The table leg (ERP) or the folding table leg (ERPP)

A table line must consist of two legs for the first platform and one leg for each additional platform.

The Ergo-Cage is one of DQN's products in the "Ergo-Line" range. As the name implies, this range is intended to provide a comfortable and efficient workplace.

Inflating a tyre can be very dangerous. The Ergo-Cage (EC) provides good protection for your staff when inflating tyres.

The Ergo-Box (EB) is also sold separately.

The adjustable legs can be individually adjusted in height. For example, the table can be placed level on an uneven floor, or inclined. The height of 65 cm to 75 cm allows the wheels to travel a considerable distance without a drive.

Thanks to the modular design, they can be assembled endlessly in series.

They allow to go from a slope to a horizontal position and vice versa without a connecting piece.

The high-quality plastic rollers can make the most sensitive rims roll harmlessly, even on the decorative side of the rim.

The rollers are mounted on 100% steel ball bearings. These bearings are also dustproof and will continue to run for a long time.

In addition, the polymer from which the rolls are made is recyclable and already comes from recycling.

If your workplace does not allow you to work in one straight line, you can also use the corner table. This ensures that wheels can easily make a 90° bend.

## OPTIONS

- Other RAL colours
- FC : Short brake for Ergo-Roll
- FL : Long brake for Ergo-Roll expands the table with two rolls (+27 cm).
- FX : Expansion of two rolls (+27cm) without brake
